

If you don't know where you are going, any road will take you there.

Lewis Carroll

Alice's Adventures in Wonderland

~~*What is the use of a book, without pictures or conversations?*~~

TEST FUNCTION SUITE

Alice

Oh my ears and whiskers, how late it's getting!

Rabbit

Curiouser and curiouser!

Alice

I wonder if I've been changed in the night? Let me think. Was I the same when I got up this morning? I almost think I can remember feeling a little different. But if I'm not the same, the next question is 'Who in the world am I?' Ah, that's the great puzzle!

Alice

Speak English! I don't know the meaning of half those long words, and I don't believe you do either!

Eaglet

~~*I can't explain myself, I'm afraid, Sir, because I'm not myself you see.*~~

PROBLEM STRUCTURE (APPENDIX)

Alice

If everybody minded their own business, the world would go around a great deal faster than it does.

The Duchess

~~*If it had grown up, it would have made a dreadfully ugly child; but it makes rather a handsome pig, I think.*~~

PROBLEM INSTANCES

Alice

We're all mad here.

The Cat

~~Why is a raven like a writing desk?~~

SURROGATE MODELS

The Hatter

Twinkle, twinkle, little bat! How I wonder what you're at.

The Hatter

Off with her head!

The Queen

~~Tut, tut, child! Everything's got a moral, if only you can find it.~~

CONCLUSIONS

The Duchess

Take care of the sense, and the sounds will take care of themselves.

The Duchess

We called him Tortoise because he taught us.

The Mock Turtle

Reeling and Writhing, of course, to begin with, and then the different branches of arithmetic – Ambition, Distraction, Uglification, and Derision.

The Mock Turtle

Well, I never heard it before, but it sounds uncommon nonsense.

The Mock Turtle

~~Begin at the beginning and go on till you come to the end: then stop.~~

INTRODUCTION

The King

I don't believe there's an atom of meaning in it.

Alice

~~Sentence first—verdict afterwards.~~

PROBLEM STRUCTURE

The Queen

You're nothing but a pack of cards!

Alice

But then, shall I never get any older than I am now? That'll be a comfort, one way – never to be an old woman – but then – always to have lessons to learn!

Alice

~~A cat may look at a king. I've read that in some book, but I don't remember where.~~

REFERENCES

Alice

I think I should understand that better, if I had it written down: but I can't quite follow it as you say it.

Alice

That's nothing to what I could say if I chose.

The Duchess

Now, I give you fair warning, either you or your head must be off, and that in about half no time! Take your choice!

The Queen

It would be so nice if something made sense for a change.

Alice

~~Read the directions and directly you will be directed in the right direction.~~

SCHEDULING

Doorknob

No wonder you're late. Why, this watch is exactly two days slow.

Mad Hatter

Let me see: four times five is twelve, and four times six is thirteen, and four times seven is – oh dear! I shall never get to twenty at that rate!

Alice

~~It was much pleasanter at home, when one wasn't always growing larger and smaller, and being ordered about by mice and rabbits.~~

GENERATING TRAINING DATA

Alice

Well! I've often seen a cat without a grin; but a grin without a cat! It's the most curious thing I ever say in my life!

Alice

~~There's a large mustard-mine near here. And the moral of that is – The more there is of mine, the less there is of yours.~~

EVOLUTIONARY SEARCH

The Duchess

~~What is the use of repeating all that stuff, if you don't explain it as you go on? It's by far the~~

~~most confusing thing I ever heard!~~

ORDINAL REGRESSION

The Mock Turtle

Ah! Then yours wasn't a really good school. Now at ours they had at the end of the bill. French, music, and washing – extra.

The Mock Turtle

*Oh, how I wish I could shut up like a telescope! I think I could, if I only knew how to begin.***Alice**

~~But it's no use going back to yesterday, because I was a different person then.~~

CONFERENCE PROCEEDINGS

Alice

It was much pleasanter at home, when one wasn't always growing larger and smaller, and being ordered about by mice and rabbits.

Alice

~~The adventures first... explanations take such a dreadful time.~~

LEARNING MODELS

The Gryphon

Either the well was very deep, or she fell very slowly, for she had plenty of time as she went down to look about her and to wonder what was going to happen next.

Narrator

Let me see: four times five is twelve, and four times six is thirteen, and four times seven is - oh dear! I shall never get to twenty at that rate! However, the Multiplication Table doesn't signify: let's try Geography. London is the capital of Paris, and Paris is the capital of Rome, and Rome - no, that's all wrong, I'm certain! I must have been changed for Mabel!

Alice

I have proved by actual trial that a letter, that takes an hour to write, takes only about 3 minutes to read

Lewis Carroll

Through the Looking-Glass

It's a poor sort of memory that only works backward.

The Queen

Now, here, you see, it takes all the running you can do, to keep in the same place. If you want to get somewhere else, you must run at least twice as fast as that!

The Queen

Now, Kitty, let's consider who it was that dreamed it all. This is a serious question, my dear, and you should not go on licking your paw like that – as if Dinah hadn't washed you this morning!

Alice

You see, Kitty, it must have been either me or the Red King. He was part of my dream, of course – but then I was part of his dream, too! Was it the Red King, Kitty? You were his wife, my dear, so you ought to know – oh, Kitty, do help to settle it! I'm sure your paw can wait!" But the provoking kitten only began on the other paw, and pretended it hadn't heard the question.

Alice

Sometimes I've believed as many as six impossible things before breakfast.

The Queen

Always speak the truth, think before you speak, and write it down afterwards.

The Queen

She generally gave herself very good advice, (though she very seldom followed it).
